MAIL DATE

DELIVERY MODE

08/27/2007

PAPER

Please find below and/or attached an Office communication concerning this application or proceeding.

The time period for reply, if any, is set in the attached communication.

Office Action Summary	Application No. 09/751,809	Applicant(s) DURDEN ET AL.	
	Examiner Reuben M. Brown	Art Unit 2623	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 27 March 2007.
 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 6-9, 19 and 20 is/are pending in the application.
 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
 5) ☐ Claim(s) _____ is/are allowed.
 6) ☒ Claim(s) 6-9 & 19-20 is/are rejected.
 7) ☐ Claim(s) _____ is/are objected to.
 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
 Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
 Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
 a) ☐ All b) ☐ Some * c) ☐ None of:
 1. ☐ Certified copies of the priority documents have been received.
 2. ☐ Certified copies of the priority documents have been received in Application No. _____.
 3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

Response to Arguments

1. Applicant's arguments with respect to claims have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 6-9 and 19-20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Oko, (U.S. Pat # 6,947,966), in view of Cowan, (U.S. PG-PUB 2001/0027564 A1).

Considering claims 6 & 9, method for formulating programming content, the system comprising;

‘releasing a plot via a website’, is met by Oko, col. 4, lines 49-55; col. 6, lines 45-60, which discusses that poll questions may be presented (col. 3, lines 32-40) to viewers to decide on

Art Unit: 2623

the outcome of a program, or how the program should proceed, (i.e., plot) via several different types of networks 76, such as the Internet (col. 6, lines 45-60).

‘receiving user votes via the website’, again Oko teaches the Internet (col. 4, lines 49-54; col. 6, lines 45-60; col. 7, lines 49-56) is one of the networks that may be used to interact with the poll questions.

‘embedding alternative plots into channels’, Oko discusses that the system is enabled to access modified content, but does not discuss that the modified content may be found on different channels. Nevertheless, Cowan discusses a headend that provides substitute programming on a plurality of channels, Fig. 1; Para [0023]- [0025]. ‘Sending an instruction to switch to an alternate channel for a particular plot’, reads on the combination of Oko & Cowan. Specifically, Cowan teaches a base band switch 127 that responds to control signals from controller 135 to selectively connect inputs 192 and 193 to the outputs of the switch, Para [0027]-[0029]. It would have been obvious for one of ordinary skill in the art at the time the invention was made, to modify Oko with the feature of placing substitute content on a plurality of channels and switching to at least one of the substitute programming at the headend, at least for the benefit of avoiding the resistance & costs of individually addressed arrangement, as disclosed by Cowan, Para [0006].

‘tabulating the votes and sending instruction for particular alternative plot’ reads on the activity of the network server 56 in Oko, which receives, records and tallies the votes of a plurality of viewers, with respect to particular poll questions, see col. 5, lines 1-25; col. 6, lines 10-30 & col. 8, lines 1-15. Oko teaches that the vote is provided to the network provider that tallies the vote and provides the vote results 20 to the content provider, which subsequently modifies the content, col. 8, lines 5-12. Thus the content provider sending the tally results to the network provider reads on ‘sending an instruction’.

It is pointed out that Cowan is particularly compatible with Oko, since the channel switch in Cowan is also based on the determination of a third party. For instance, when a market researcher determines that a signal should be substituted for a normal signal, the controller sends the switch signal to the switching device, [0023], [0029]-[0030].

Regarding claim 9, the claimed feature of ‘particular alternative plot’ corresponds with ‘particular alternative plot’, as recited in claim 6, and is likewise treated.

Considering claims 7-8 & 19-20, sending the instructions to the transmission facility, such that the instruction is automatically sent based on the tabulated votes reads on (col. 5, lines 1-55; col. 6, lines 1-25), which teaches that the content provider(s) sends the tally results to the network provider(s), which reads on the ‘instruction’. As pointed out above, ‘the instruction to switch to an alternate channel’, is met by the disclosure of Cowan, Para [0028], [0038]-[0039].

Art Unit: 2623

Regarding claims 8 & 20, 'linking the website to the transmission facility', reads on scenario of users answering a poll question via the Internet, and the results being sent to the transmission facility, which is taught by Oko, col. 4, lines 48-55; col. 6, lines 45-60. It is noted that linking does not recite any particular limitations such as using HTML or over PSTN, etc.

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

- A) Gupta Teaches a plurality of different streams that can be switched at the headend.
- B) Franco Teaches user's interacting with a web page to control content delivered at the receiver site.
- C) Klosterman Teaches the headend sending an instruction to switch a channel at the user site.

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

Art Unit: 2623

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Art Unit: 2623

Any response to this action should be mailed to:

Commissioner for Patents
P.O. Box 1450
Alexandria, VA 22313-1450
www.uspto.gov

or faxed to:

(571) 273-8300, (for formal communications intended for entry)

Or:

(571) 273-7290 (for informal or draft communications, please label
"PROPOSED" or "DRAFT")

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Reuben M. Brown M. Brown whose telephone number is (571) 272-7290. The examiner can normally be reached on M-F(8:30-6:00), First Friday off.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Christopher Kelley can be reached on (571) 272-7331. The fax phone numbers for the organization where this application or proceeding is assigned is (571) 273-8300 for regular communications and After Final communications.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
